

Insider Tips to buying Nike Products

Insider Tip #27

What To Do When A Nike Product at Nike.com That You **Really** Want is *SOLD OUT*?

We have all been there. You find something that **you **really** want** only to find that *Sorry SOLD OUT*. Here's an Insider Tip that will help you still get that Nike product. **You still have a very good chance.**

Here's How Find Nike Products, and maybe even ***at a Deal...***

First you need to collect some information about the product you want. You will need:

- Product Name (Full Name from Nike)
For example, you need more than running shoes. You need Air Jordan Model X, Color Y, Size Z
- Product Model #, Color, Size, Price
- UPC - Very Helpful but not mandatory (hint: it's the barcode #)

As a general rule, gather anything that if you gave the information to the store manager he could find the product you are looking for. The more detailed information the better your chances.

The Insider Tip:

Nike as you know has one of the best customer service experiences in the world. If there is anything Nike is known for it's *Quality and Service*.

Get Ready! You are about to experience Nike's Service.

In your area there is probably a NIKETOWN, NIKE STORES, NIKE FACTORY STORES close by.

- Go to [Nike.com Home Page](#) and click on the Store Locator
- Find a Store in your area and call that store. You can call any store, but no need to make a long distance call if you don't have to.
- Ask to speak with the store manager (if available) or someone who can help you find a product.
- Ask if they have that product in stock. If not, ask them to check to see if any other Nike Stores, Nike Factory Stores, NikeTown has that product.

All the Nike Factory Stores are connected and they can see if another store has your product. If they do, that store will ship it to you.

If the Nike Store or Nike Factory Outlet Stores can't find it and their systems show it is out of stock or Sold Out, then it truly is Sold Out!
